HOW GOOD WE'RE GETTING  
AT PREDICTING THE ECONOMY

Image by Tucker Nichols as shown in What Is Economics Good For?, by A. Rosenberg & T. Curtain, NY Times, 8.24.2013 <https://opinionator.blogs.nytimes.com/2013/08/24/what-is-economics-good-for/>

**“The trouble with economics is that it lacks the most important of science’s characteristics – a record of improvement in predictive range and accuracy.”**

***A. Rosenberg & T. Curtain  
NY Times – 8.24.2013***

# thoughts on global output

- GDP growth steady
- small downward adjustments
- susceptible to short-run shocks
- > 3% look to developing world

# farm financial outlook

# Net farm income and net cash farm income, 2000–20F

\$ billion (2020)

Note: F = forecast. Values are adjusted for inflation using the chain-type GDP deflator, 2020=100.

Source: USDA, Economic Research Service, Farm Income and Wealth Statistics. Data as of February 5, 2020.

# Government farm program payments to farm producers, 2010–20F

Note: F = forecast.

1/ All other payments include supplemental and ad hoc disaster assistance, tobacco transition, Cotton Ginning Cost Share, dairy, and miscellaneous programs.

2/ Includes Price Loss Coverage (PLC), Agriculture Risk Coverage (ARC), counter-cyclical payments (CCP), Average Crop Revenue Election (ACRE) payments, loan deficiency payments (excluding grazeout payments), marketing loan gains, and certificate exchange gains. CCP and ACRE were not continued in the 2014 Farm Bill. PLC and ARC payments began in 2015.

3/ Includes direct fixed payments portion of Direct and Counter-Cyclical Program (DCP) and Cotton Transition Assistance Program (CTAP) payments (in 2014/15).

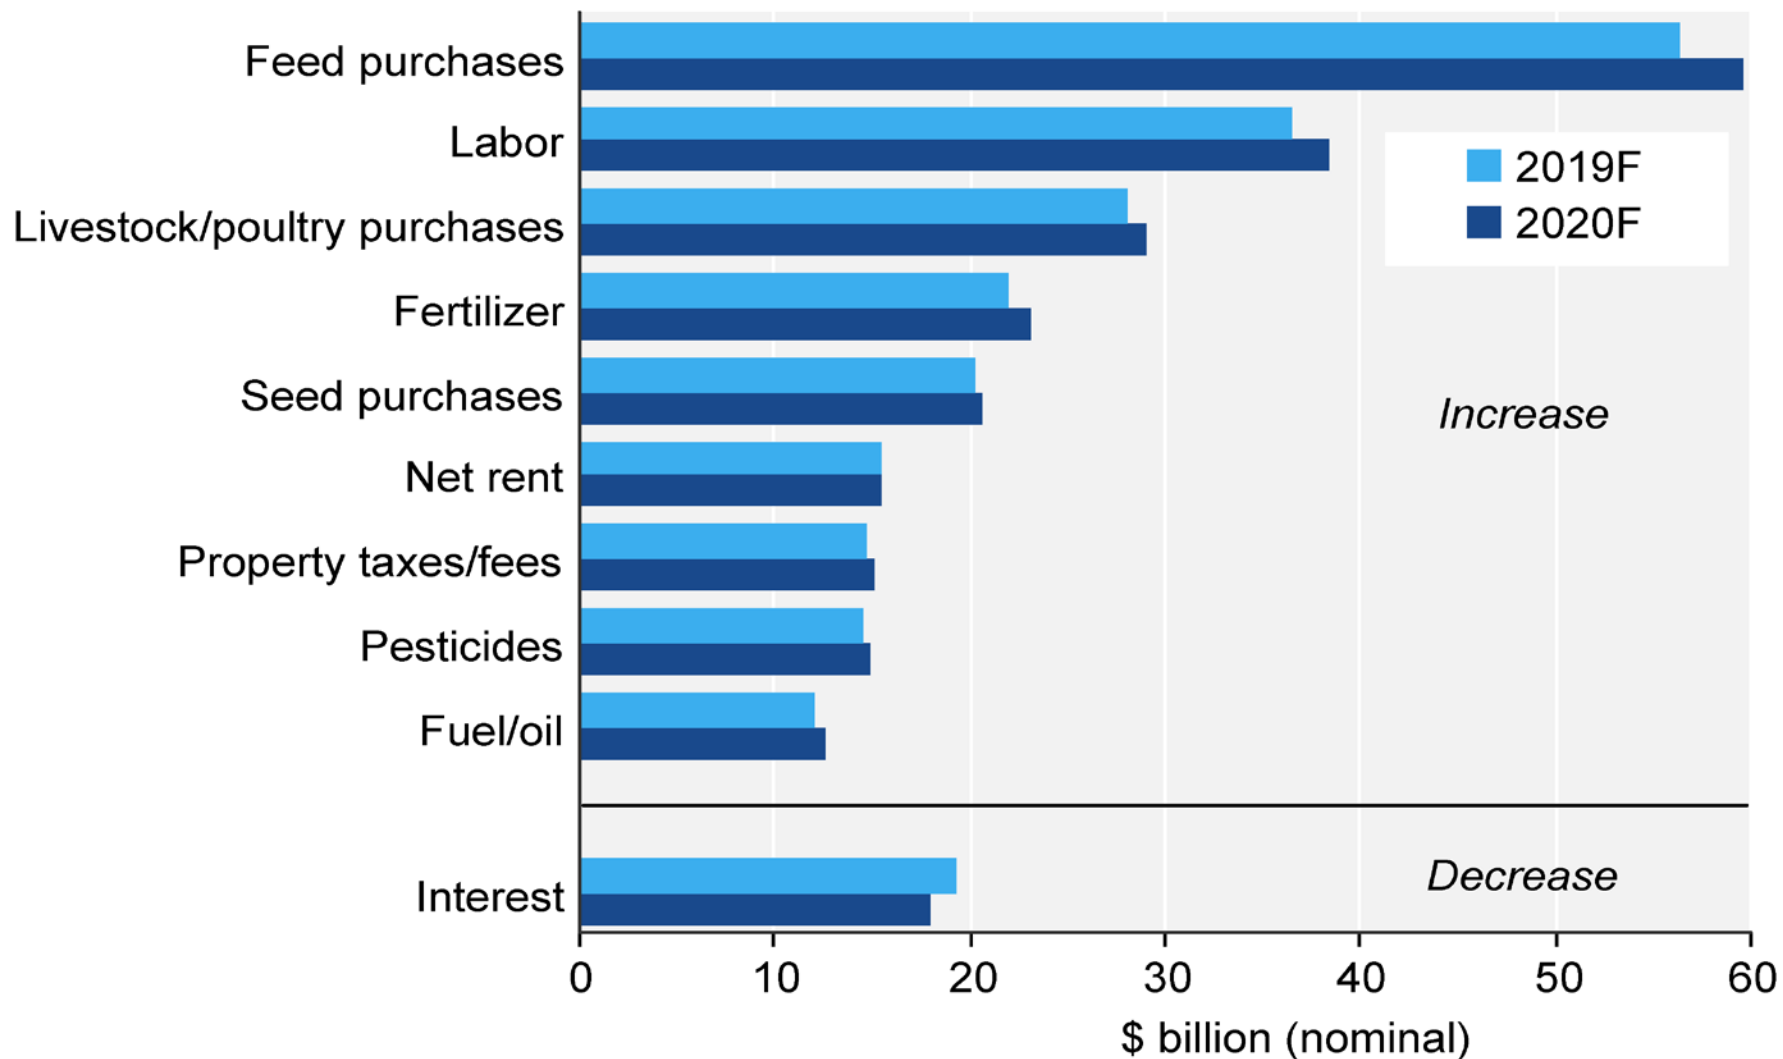

Source: USDA, Economic Research Service, Farm Income and Wealth Statistics.

Data as of February 5, 2020.

# Government Farm Program Payments 2011 to 2020F

## Selected farm production expenses, 2019F–20F

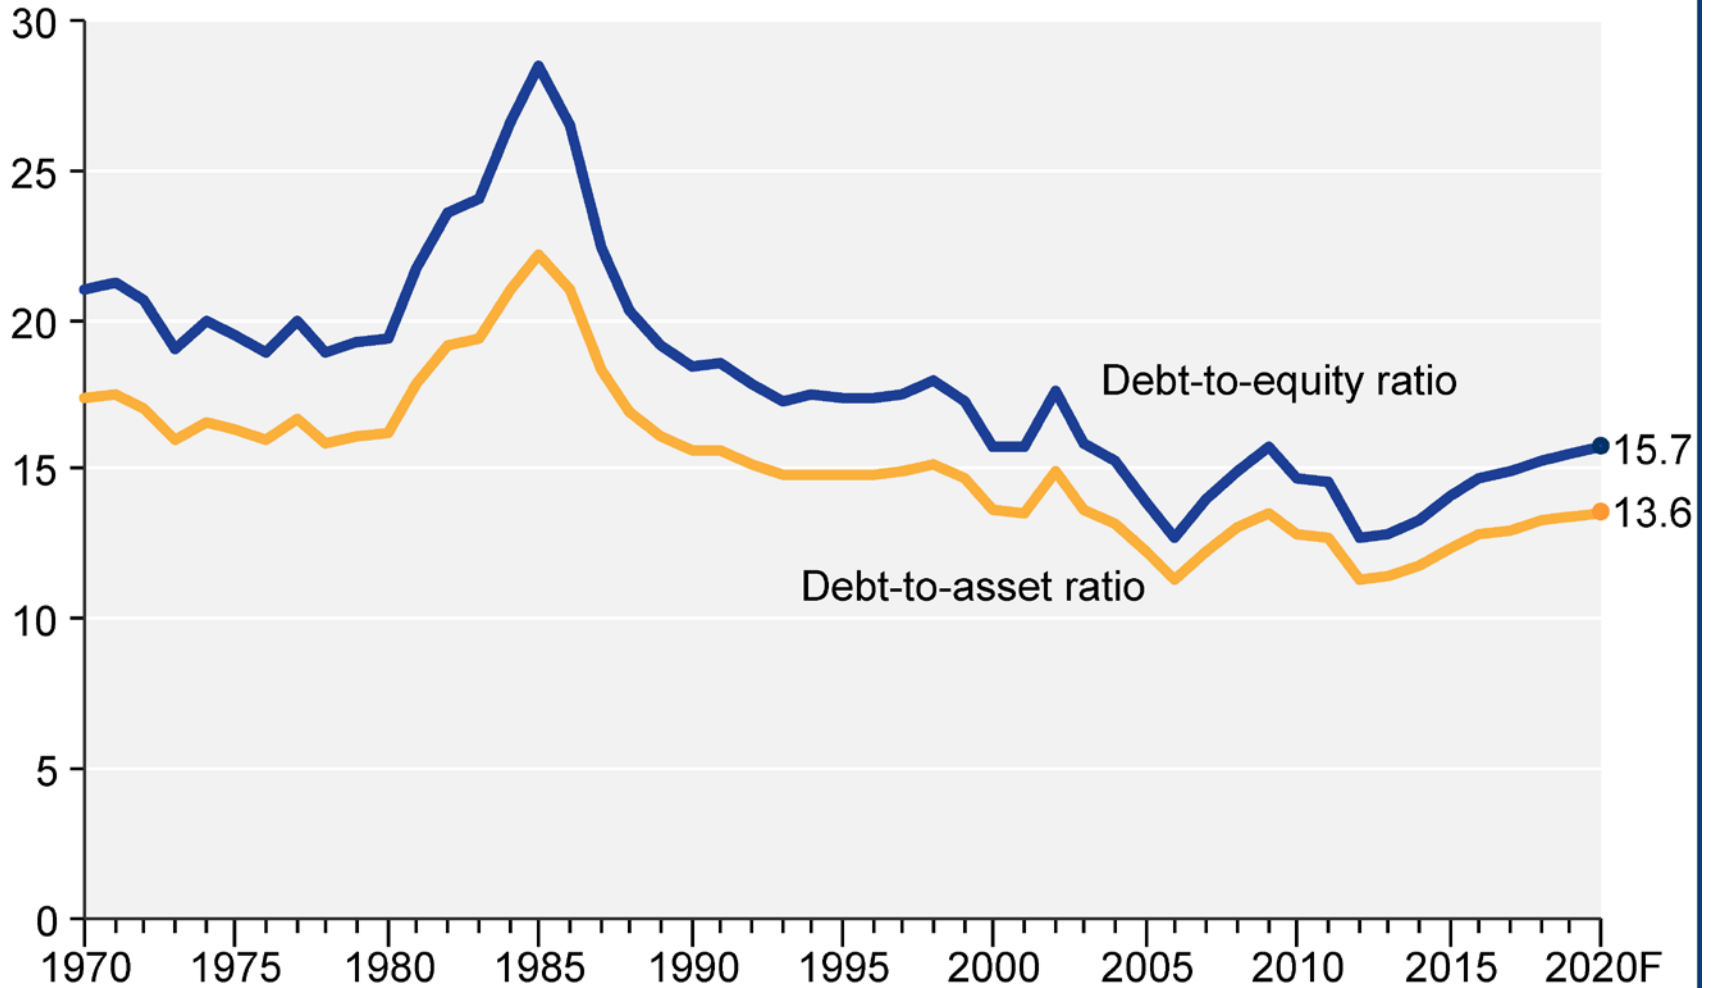

Note: F = forecast.

Source: USDA, Economic Research Service, Farm Income and Wealth Statistics.

Data as of February 5, 2020.

# Farm sector solvency ratios, 1970–2020F

Percent

Note: F = forecast.

Source: USDA, Economic Research Service, Farm Income and Wealth Statistics.

Data as of February 5, 2020.

- Total equity
- Total assets
- Total debt

**U.S. farm assets, debt, and equity, 1970 to 2020**

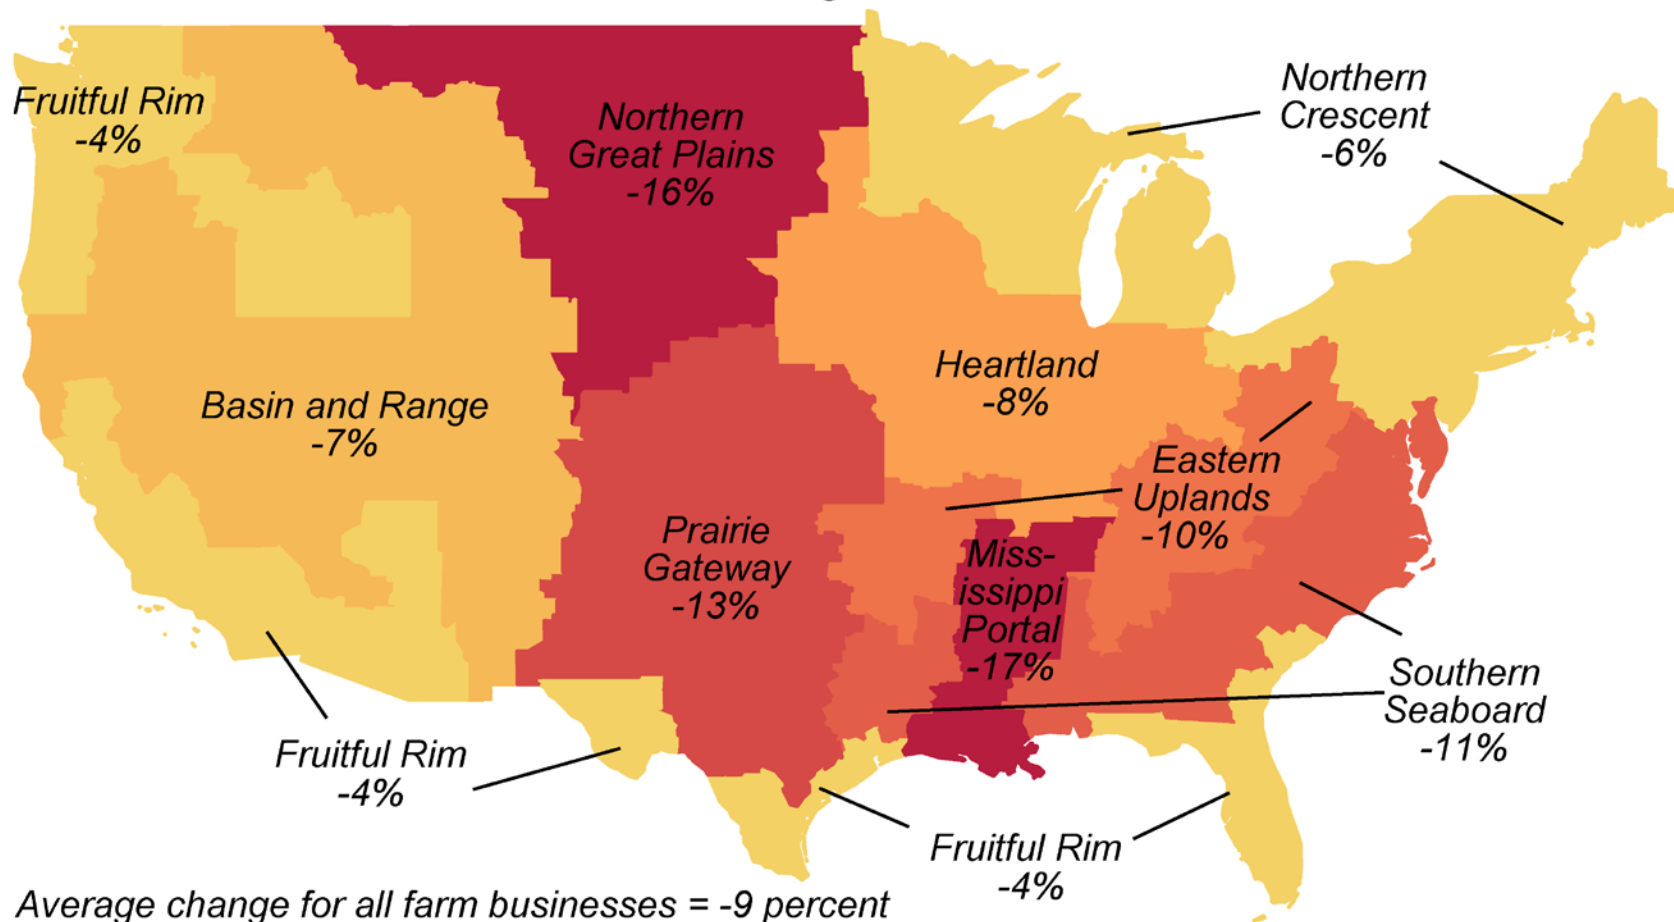

Data for 2019 and 2020 are forecasts. Data values are rounded to the nearest thousand dollars. Inflation-adjusted values use the chain-type GDP deflator, 2020=100. K=thousand, M=million, B=billion, T=trillion.

# Debt vs. Working Capital

# Farm business average net cash farm income by resource region, 2020F compared with 2019F

Percent change 2019F–2020F

Note: F = forecast. The partial budget forecast model is based on the Agricultural Resource Management Survey (ARMS) using parameters from the sector forecasts. The model is static and does not account for changes in crop rotation, weather, and other location-based production impacts that occurred after the base year. Data as of February 5, 2020.

Source: USDA, Economic Research Service, Farm Income and Wealth Statistics.

## Average Net Cash Farm Income: Farms > \$350K

Commodity Specialization / Resource Region	Change 2019F to 2020F	Correlation w/Fruitful Rim (2011 to 2020)
Fruitful Rim	-4.4%	1.00
Cotton	-16.7%	0.16
Specialty Crops	-6.0%	0.76
Other Crops	-14.4%	0.68
Cattle / Calf	-13.4%	0.74
Dairy	+4.0%	-0.13

**AZ net farm income correlation with Fruitful Rim (2011 to 2018) = - 0.34**

# thoughts on farm finance

- revenue flat – less govt. support
- higher expenses (bearing interest)
- equity keeping solvency in check
- debt vs. liquidity divergence
- AZ better diversified

- Effective Federal Funds Rate
- Federal Funds Target Range - Upper Limit
- Federal Funds Target Range - Lower Limit

**0.25%**

**Dec'17  
1.50%**

**Dec'18  
2.50%**

**Dec'19  
1.75%**
